

Dilute acetic acid

A hydrocarbon with molecular mass >100

2-Propanol

0.30 mole of sodium bicarbonate.

A polymer of vinyl chlorid.

An oxide of a transition element.

Acetylsalicylic acid.

Ions.

SiO₂

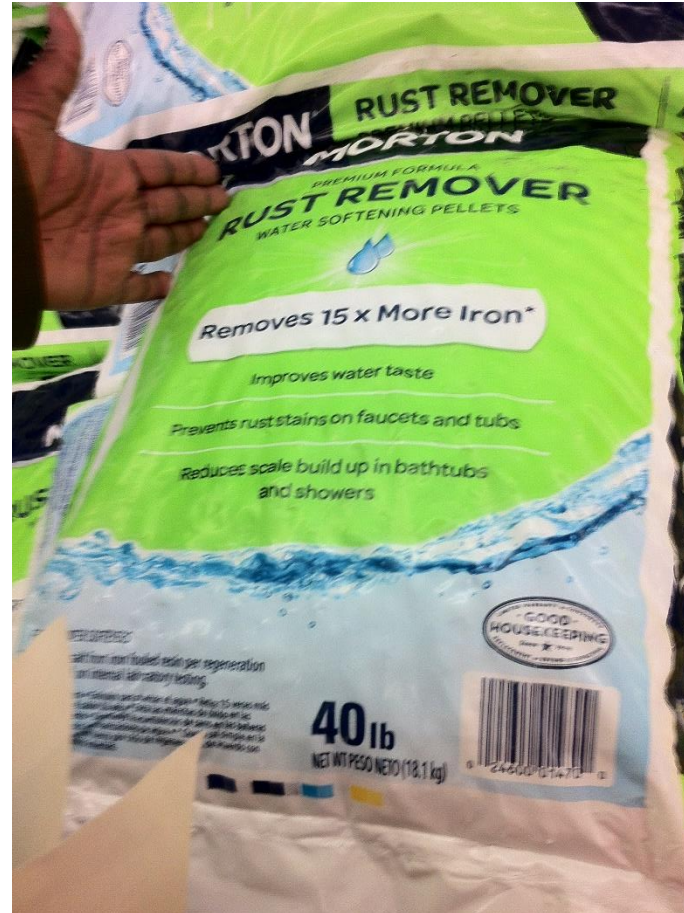

An inert gas.

An emulsion.

Something to lower the freezing point of water.

#14

#15 NaCl.

#16 Polar molecules.

#17 A metalloid.

#20 Nonpolar molecules.

#25 A volatile liquid.

#21 A homogenous substance.

#28 A nonmetal.

#30 An electrolyte.

#36 A hydrated crystal.

#33 A list of all the winners of the Noble Prize in Chemistry for the last 10 years.
